

CUSTOM MORPHING SERVICE

1. PLEASE READ OUR HELPFUL [Tips for Getting the Best Custom Morphs](#)

2. NEXT, PLEASE FILL OUT A PROJECT SPECIFICATIONS FORM

To help us provide an accurate quotation, please complete our [Project Specifications Form](#) and submit it to [CustomMorphing \(at\) OOZandOZ.com](mailto:CustomMorphing@OOZandOZ.com) with any existing artwork, logo, photographs, and/or layout sketches in the following PC file formats: .jpg, .psd, or .pdf.

3. YOU WILL RECEIVE YOUR QUOTATION

We'll review your specs and images and email our quotation to you.

4. LICENSE AGREEMENT & DOWNPAYMENT

Our images are licensed for a specific period of time, or for a one-time use. Once you have approved our quotation, we'll send a License Agreement for your signature, along with an invoice. Production of a custom image commences when we receive a signed and dated License Agreement along with a 50% deposit and a purchase order (if applicable.) The remaining balance is due within 30 days of receipt of the final morphed artwork. Payments may be made by check, credit card or international wire transfer. If payments are made by wire transfer an additional \$20.00 fee per transaction will be required.

5. PRODUCTION TIME & PROOFING OF IMAGES

We need five business days to produce the final morphed artwork. Once the Morph is completed, we will notify you by email or by telephone and ship you a low resolution print of your custom Morph plus one Mirror Decoder for viewing. Upon your emailed or faxed approval to us, we will email you the final image as a high resolution .jpg or .pdf attachment.

6. COPYRIGHTS

Our dated copyright - e.g. ©2015 OOZ & OZ - must appear no smaller than 10 point type either along the curve of the Decoder positioning circle or within the perimeter of the licensed artwork on all final output.

7. RESIZING OF IMAGES

Custom Morphs are created to be printed at one specific size to suit our standard size Mirror Decoders. Should you desire to use the images at another size, our artists will re-size the images to match your reflectors ensuring end users have a successful viewing experience. This may require an additional fee.

8. MIRROR DECODERS

High quality Morphs are the first crucial component of OOZ & OZ's concept. Picture-perfect Mirror Decoders are the second. We maintain strict quality control of Mirror Decoders. OOZ & OZ makes two kinds of Mirror Decoders, both reasonably priced. Should you wish to obtain your own reflectors, we will require two product samples and pricing quoted on the manufacturer's /converter's dated letterhead. Approval of samples will be at OOZ & OZ's sole discretion. If the samples are acceptable, then it becomes our option to match the pricing quoted.
